PERSONAL PROJECTS

Hotel Management System By Using Java

- Implemented a Java-based hotel management application, utilizing OOP principles, design patterns, and modules for room availability, reservations, check-ins/check-outs, and reports. Handled user input and decision-making logic to create an interactive interface, enhancing user experience and system functionality.

Spotify Clone By Using HTML & CSS

- Developed a Spotify clone utilizing HTML and CSS, focusing on responsive design and user interface replication. Demonstrated proficiency in front-end development through the creation of visually appealing and functional web pages

Amazon Clone By Using HTML & CSS

- Replicated the user interface of Amazon using HTML and CSS, providing a visually appealing and responsive online shopping experience

Calculator By Using HTML , CSS & Javacript

- Developed a fully functional calculator using HTML, CSS, and JavaScript, allowing for accurate mathematical calculations with a sleek and intuitive user interface.
